

Stop Motion Animation Project

Task: Create a one minute stop motion animation

Who: Groups of 1-3 people

Create a movie using pictures to create the illusion of movement. Your film should have a background that makes the viewer feel like they're in that "world." The wall shouldn't be seen on the sides of your picture nor should your hand appear in the movie. Your movie needs to include at least 3 sound effects or other sound clips. It should have titles at the beginning and credits at the end.

What to do

1. Watch stop motion example videos
2. Fill out the planning document
3. See Mrs. Campau about borrowing toys/figurines for your animation.
4. Create a background
5. Take your pictures
6. Put your pictures into Pinnacle to create a movie.
7. Add sound effects to enhance your movie.
8. Export your final movie to the appropriate folder.
